Заголовок	ESSENCE OF THE CONCEPT "LEGAL CULTURE", ITS COMPONENTS
Аннотация	<p>Legal culture is an integral part of the general culture of the people and the individual. It should be borne in mind that culture is understood not only as spiritual achievements, but also material values created by man in the process of his creative activity. In this regard, the legal culture includes all the achievements of legal theory and practice. All positive, positive, accumulated by mankind in the field of law - this is the legal culture. We can distinguish the objective and subjective aspects of legal culture. Legal culture depends on morality, on the level of economic development of society, on the material well-being of the people. But this is a special value of society. If society has a certain level of legal culture, then we can talk about the formation of a rule of law state. If there is no this legal culture, then the formation of a rule of law is extremely difficult. The rule of law and the rule of law are organically interconnected, and the existence of a democratic civil society is a prerequisite for the formation of a legal culture and the rule of law</p>

Заголовок	THE CATEGORY OF OPPOSITE IN A LITERARY TEXT: ORIGINAL AND TRANSLATION
Аннотация	The paper proposes a comparative analysis of the category of op- positive in its particular linguistic manifestation on the basis of the original and translation of T. Hardy's short story The Three Strangers. The author proceeds from the statement about the universality of the category of opposite as socio- cultural and linguistic-cognitive phenomenon. Language manifestations of op- positive in syntactic and lexical-semantic levels are compared by the author of the article with the involvement of two languages - English and Russian.

Заголовок	DERIVATIONAL POTENTIAL OF ADJECTIVES DENOTING MENTAL STATES / ATTRIBUTES OF A HUMAN
Аннотация	The article is dedicated to the research of lacunarity of derivational paradigms of adjectives denoting mental characteristics of a human in forming names of persons. On the basis of the analysis of realization / non-realization of derivational potential of adjectives an attempt is being made to determine which parameters of feature semantics are relevant to a native speaker in forming nouns with the meaning attribute bearer.

Заголовок	"CHINESE TEXT" OF RUSSIAN LITERATURE 1990 – 2010

Аннотация	The article presents an analysis of the Chinese text in Russian literature, 1990 - 2010. In modern literary criticism, the study of various versions of thematic texts has become widespread, among which the Chinese text is a new direction. This article discusses works of art depicting life in Shanghai and Harbin, which represent a special version of the Chinese text of Russian literature. The Chinese text of Russian literature (starting from the first decades of the XIX century) was oriented towards active interaction with mass literature and correlated with the problems of intercultural communication and trans-cultural dialogue, with the formulation and solution of the problem of understanding - misunderstanding that arises between individuals and peoples.

Заголовок	FICTION AS AN INTEGRATIVE ELEMENT OF EDUCATION (UP-TO-DATE FOREIGN LITERATURE AS AN EXAMPLE)

Аннотация	<p>The objective of the research is up-to-date foreign literature which helps one be involved socio cultural field, widen a future specialists outlook. There are several strategies represented in foreign fiction. The main attention is paid to the following aspects vividly described in the 20th century literature: the problem of self-realization, self-development, self-discovery, presentation of another as the principle body of the current culture, person-family, person-society, person-person. The conclusion is made, that the involvement into the world of fiction forms a Citizen, a Person of a high culture, helps develop heuristic thinking, esthetic taste and ideals, widens engineering range, and provides an optimal adaptation of a higher educational institution graduate in the conditions of economics and market relations. Not only fiction entire perception, but also everyday peculiarities provide an integrated function of fiction within the process of education. As a whole, fiction forms students needs of self-realization, self-assertion as an individual creative subject of the culture, as a definite personality.</p>

Заголовок	HORMESIS AS AN OPTION OF MANAGEMENT TACTICS FOR PATIENTS IN CHRONIC STRESS
Аннотация	The modern rhythm of life often determines the state of the human body and, accordingly, the possibility of finding it in chronic stress. In this state, the human body may not be ready for additional requirements, which are some methods of aesthetic medicine. Optimization of management approaches for patients in chronic stress is necessary to predict the outcome and minimize adverse events after procedures that start the process of reparative regeneration.

Заголовок	CHARACTERISTICS OF PLANNED HOSPITALIZATION OF A CITY HOSPITAL
Аннотация	The article describes the planned hospitalization in the largest city hospital in Samara. There has been a recent increase in the number and proportion of planned hospital admissions in a hospital. The largest share of planned hospitalizations is noted in the departments of gynecological, neurosurgical and surgical profiles. Financing of planned hospitalization is carried out mainly at the expense of compulsory medical insurance. Mostly, the patients of nearby city polyclinics are sent for planned hospitalization in a hospital.

Заголовок	THE REASONS OF COMBINATION OF DYNAMIC ELECTRIC NEUROSTIMULATION AND SPECTRAL PHOTOPHORESIS OF TRACE SUBSTANCES FOR IMPROVING THE APPEARANCE AND RESTORING ADAPTATIVE RESERVES OF THE BODY
Аннотация	Dynamic electroneurostimulation is a variant of personalized microcurrent therapy based on the automatic change of pulse parameters in accordance with changes in the surface impedance of the skin during the procedure. Spectral phototherapy is based on exposure to a linear light spectrum source, the resonance line of radiation of which is pre-set by selecting the source material of the body. The theoretical rationale for the rational combination of these two medical technologies for the comprehensive elimination of cosmetic defects and the restoration of adaptive reserves of the body is presented.

Заголовок	THE EFFECT OF EXTRACORPOREAL BLOOD PURIFICATION ON THE CYTOKINE PRODUCTION IN SEPSIS
Аннотация	The article presents preliminary results of the pilot study, in which serum proinflammatory cytokine and soluble cytokine receptor levels and ne- opterin concentration were evaluated before and after selective endotoxin ad- sorbtion and coupled plasma filtration adsorbtion in patients with gramnegative sepsis. No significant differences were revealed. These may be due to individual characteristics of immune system and the phase of inflammatory response.
